

**Annex 29****Registration****Scope of the review on
“A power generation project using waste heat from the Coke Dry
Quenching (CDQ) equipment in China” (1625)**

1. The Board agreed to undertake a review of the project activity “A power generation project using waste heat from the Coke Dry Quenching (CDQ) equipment in China” (1625).
2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover a review of the:
 - a) application of the baseline methodology, through an assessment of the validation of the input values used in the economic comparison of baseline alternatives; and
 - b) validation of the carbon emission factor of the captive power plants.
