Annex 50

Registration

Scope of the review on
“Zhejiang Quzhou Jutai clinker production project by using calcium carbide residue in the raw mix” (2139)

1. The Board agreed to undertake a review of the project activity “Zhejiang Quzhou Jutai clinker production project by using calcium carbide residue in the raw mix” (2139).

2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover a review of the means of validation of the application of the approved methodology, through an assessment of the validation of the calculation of the baseline parameter LOI, as the DOE has relied on the opinion of a third party not designated by the CMP to derive its own final validation opinion.
