

**Annex 52****Registration****Scope of the review on****“GHG emission reductions through waste gas based power generation at Visa Steel Limited”  
(2369)**

1. The Board agreed to undertake a review of the project activity “GHG emission reductions through waste gas based power generation at Visa Steel Limited” (2369).
2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover a review to assess the application and the determination of the baseline scenario as the baseline selected is a new 115 MW coal based captive power plant whereas the methodology limits the baseline scenario for power generation to be an specific existing power plant or grid import.
