- Only 2 % of CDM projects originate from Africa
- Africa lowest per capita emissions in the world which means scope for reducing emissions is correspondingly lower than in other regions

### **On-going Activities: (More can be done if funds are available for NF)**

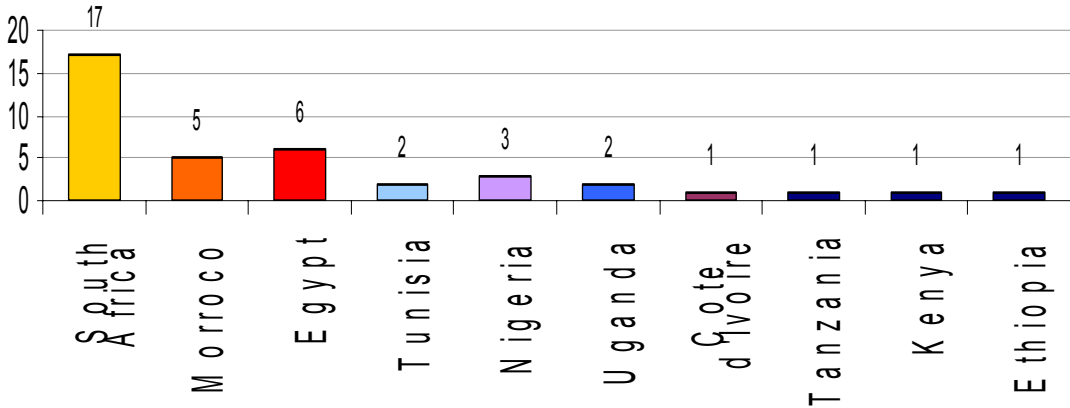

- Encouraging donors to fund the Nairobi Framework activities
- Providing capacity building support to DNAs
- Mobilizing funding for CDM projects
- Support to project developers and DNAs with software tools for projects
- Capacity building of country programmes to promote and scale up carbon finance development in priority sectors
- Engaging and promoting private sector investment in CDM projects
- Promoting public and private partnerships
- Organizing Regional Carbon Forums
- Exchanging information and experiences among CDM stakeholders - in particular, to create enabling environment for private sector investment
