

REVIEW OF THE PROJECT ACTIVITY

Reduction of Flaring and Use of Recovered Gas for Methanol Production (0972)

The Board agreed to reject the project activity, submitted for registration by the DOE (DNV Certification AS), because the methanol plant is within the project boundary and commenced construction in 1998 and the project participant and the DOE therefore failed to substantiate that the project start date was not before 1 January 2000, as required by paragraph 13 of Decision 17/CP.7.
