

**CDM: Revision Form for Approved Methodologies
(version 01)**
(To be used for responding to requests for clarifications on approved methodologies)

Date of Meth Panel meeting:	31 January-3 February 2006
Title/Subject (give a small title or specify the subject of your submission, maximum 200 characters):	Consideration of CDM projects in the build and operating margin
Indicative methodology to which your submission relates	ACM0002, AM0005, AMS 1.D.
Name of the authors of the query:	DNV
Summary of the query:	
Please use the space below to summarize the request for clarification on the related approved methodologies.	
>> DNV requests clarification on whether CDM projects should be excluded from the OM and BM calculations by the same logic they are now currently excluded from the ACM0002 build margin.	
Recommendation by the Meth Panel:	
Please use the space below to provide amendments /changes (in your expert view, if necessary).	
>> Logic suggests consistent treatment, thereby adding stipulations to exclude CDM projects from all electricity baseline calculations.	
For ACM0002.	
<ul style="list-style-type: none"> • Following “Calculations for this combined margin must be based on data from an official source (where available)³ and made publicly available.” on p.5 add: “Power plant capacity additions registered as CDM project activities should be excluded from all calculations below (subsets <i>j</i>, <i>m</i>, <i>n</i> below).” • On p. 9, remove “Power plant capacity additions registered as CDM project activities should be excluded from the sample group <i>m</i>.” 	
For AMS 1.D. on p.13, add the following footnote after “all generating sources” and after “recent capacity additions to the system”:	
<ul style="list-style-type: none"> • “Power plant capacity additions registered as CDM project activities should be excluded.” 	
For efficiency and consistency, ACM0002 and AM0005 should be combined, and AM0005 removed.
