## Comments by Parties, Stakeholders and NGOs

TÜV SÜD published the project documents on UNFCCC website and on its own website

([http://www.netinform.de/KE/Wegweiser/Guide2.aspx?ID=926&Ebene1\\_ID=26&Ebene2\\_ID=167](http://www.netinform.de/KE/Wegweiser/Guide2.aspx?ID=926&Ebene1_ID=26&Ebene2_ID=167) ). The PDD was open for commenting from 06th of February 2005 for 30 days.

One comment was received.

Competence.  
Certainty.  
Quality.

## Content of the comments received

A comment has been submitted on 24.02.2005 by Axel Michaelowa, Hamburger Welt-Wirtschafts-Archiv (HWWA). HWWA is an accredited observer organisation to the United Nations Framework Convention on Climate Change Conference of the Parties.

The comment has the following content:

*"The baseline emission factors are from an outdated (three-year old) IEA study and should be updated with more recent data. "*

## Response by TÜV SÜD

The comment has been submitted during the 30 days stakeholder period and is submitted by an accredited observer organisation. Hence the comment had to be considered in the validation process.

TÜV SÜD has included the aspects addressed by the comment in the discussions with the project developer (see Corrective Action Request No. 1 in chapter 3.2.2). The project developer investigated a new data base for calculating a most recent grid factor. The data base is provided by the national dispatch centre and the Brazilian Ministry of Energy and Mining.

Due to the rejection of the old data base and the development of a new reliable data base by the project developer the validation team regards as the comment sufficiently considered in its opinion.
