

For CDM while launch the dialogue at the seventh session of the CMP. The terms of reference, we like to add;

-CDM can managed in large only with Agriculture & Forest developments.

-World over Exchange of new Ideas, Technologies, Know-How, Modern Facilities, Tools etc.

-Establishment of small Nurseries, Horticulture Institutions, Forest Research Facility,

-Developing Fast wood Growing Plants/Trees, seeds, Croppings systems

-Specially cropping in 100,000 Hectors of Bamboo trees, particulaly on both sides of Rivers which is remedies for Flood Desaster, less debries of Flood, also Controll the Water way of river speading water in large.

help the Envireonment controll.

With use of Thin-Bamboo in unique Housing arrangemts, in surroundings of Rivers-beds in millions acers of land

living people/frmers can much save Years to Years their livings, Rooms (with Bamboo walls), Bounderies,

Shelturs of Animals, stores, etc. during and after decrease of yearly Flood-Water.

Bamboo local industry may estalish there, like cottge industry.

women will involved in Products of Bamboo industry.

Even Bamboo Thred can produced for various Textile uses.

In Pakistan there is yearly losses about \$560 Billions in Ready crops, housing, buildings, machinerires etc.

-world over uses/Echange of R&D results in Agri and Forest development can boost/improve CDM.

-Improvement/controll in Health can possible with environemnt protection

If you need more we can provide you some pictues, data information or more comments on CDM, future challenges.
