

Inputs for Terms of Reference for the Policy dialogue on the Clean Development Mechanism

1. To analyze the shortcomings of the mechanism, it is essential to incorporate experience from the project participants/Consultant/DOEs.
2. While the panel is working on the dialogue, it should be taken care that the further guidelines that are proposed shall consider the timeframe that one has to invest to take a clean initiative as a CDM project activity for registration with the board.
3. To ensure the effectiveness of the mechanism, it is important that the major polluters show a serious interest to extend the Kyoto and a long term commitment to combat climate change.
