Re.: Query on the calibration requirement for the electric meter that is used to measure the imported electricity amount

Dear Mr. Jung Young Geon,

Thank you for your letter received on 16 September 2011, which has been considered by the Board at its 64th meeting.

On behalf of the Chair of the Board, I would like to thank you for bringing your concerns to the attention of the Board regarding the impossibility to implement the calibration procedures as required.

The Board noted that there are projects where the measuring equipment is beyond the control of project participants and therefore the monitoring requirements can not be followed as per the General guidelines to SSC CDM methodologies and the registered PDD appropriately applying the concerned methodology.

In order to address the issue, the Board requested the secretariat to prepare a draft revision of the Guidelines for assessing compliance with the calibration frequency requirements.

Yours sincerely,

Andrew Howard
Secretary to the CDM Executive Board
