Re.: Inclusion of more than one large scale component/project using the same measure into one CPA

Dear Ms. Nagai,

On behalf of the Chair of the CDM Executive Board (the Board), I would like to thank you for your letter of 23 July 2013 requesting clarification on the scale and number of components allowed in a single large scale CPA. Your letter has been made available to the Board.

On behalf of the Chair of the Board, I would like to inform you that an answer to your request for clarification was already provided via cdm-info@unfccc.int.

On behalf of the Board, I would nevertheless like to reiterate that for single component project activities (CPAs), no limit to the installed capacity or number of plants included applies as long as:

- (i) no use is made of simplified modalities and procedure for small scale CDM project activities or specific provisions related to micro scale project activities and,
- (ii) the installed capacity and/or scale of the emission reductions implemented or number of plants included is not otherwise restricted by the methodology(ies) or tools applied.

Thank you once again for contacting the Board with your concerns.

Yours sincerely,

Andrew Howard
Secretary to the CDM Executive Board
