

**Annex 29****Registration****Scope of the review on****“Production of blended cement with blast furnace slag at Cimento Mizu” (0854)**

1. The Board agreed to undertake a review of the project activity “Production of blended cement with blast furnace slag at Cimento Mizu” (0854).
2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover an assessment to determine:
 - (a) the additionality of the proposed project activity, in particular the existence and significance of barriers to increasing the level of blast furnace slag in blended cement from the blending level in the baseline thereby providing information on the financial consequences of the barriers claimed as well as all costs savings related to increasing the blast furnace slag content.; and
 - (b) whether the benchmark calculations required by the approved baseline methodology have been correctly applied.
