

**Annex 4****DRAFT Guidance for determining the occurrence of de-bundling under a programme of activities (PoA)****(Draft Version 01)**

The Board, at its thirty-second meeting, requested the secretariat to prepare draft PoA guidance for small-scale and small-scale afforestation and reforestation project activities taking into account the report by the small-scale and the A/R working groups and comments by members at this meeting.

1. For the purposes of registration of a Programme of Activities (PoA) the guidance in Appendix C of the Simplified Modalities and Procedures for Small-Scale CDM project activities (A/R and non A/R)¹ shall apply *mutatis mutandis* for determining if a de-bundled large scale CPA has applied a small scale non A/R or small-scale A/R methodology under a PoA.

OR

2. For the purposes of registration of a Programme of Activities (PoA) a proposed small-scale CPA of a PoA shall be deemed to be a de-bundled component of a large scale CPA if there is a registered small-scale CPA of a PoA or an application to register another small-scale CPA of a PoA or another registered CDM project activity:
 - a. With the same activity participant as the proposed small scale CPA or by a coordinating or managing entity which also manages a large scale PoA of the same sectoral scope, and;
 - b. Whose CPA boundary is within 1 km of the CPA boundary of the proposed small-scale CPA at the closest point.
3. If a proposed small-scale CPA of a PoA is deemed to be a debundled component in accordance with paragraph 2 above, but the total size of such a CPA combined with a registered small-scale CPA of a PoA or a registered CDM project activity does not exceed the limits for small-scale CDM and small-scale A/R project activities as set out in Annex II of the decision 4/CMP.1 and 5/CMP.1 respectively, the CPA of a PoA can qualify to use simplified modalities and procedures for small-scale CDM and small-scale A/R CDM project activities.

¹ Criteria for determining the occurrence of de-bundling: Appendix C of the Simplified Modalities and Procedures for small-scale CDM project activities (contained in Annex II of decision 4/CMP.1 or http://cdm.unfccc.int/Projects/pac/pac_ssc.html) and Appendix C of the Simplified Modalities and Procedures for Small-Scale A/R CDM project activities (contained in Decision 6/CMP.1, FCCC/KP/CMP/2005/8/Add.1, page 92)
