

**Annex 19****Registration****Scope of the review on****“CEMEX Costa Rica: Use of biomass residues in Colorado cement plant” (1405)**

1. The Board agreed to undertake a review of the project activity “CEMEX Costa Rica: Use of biomass residues in Colorado cement plant” (1405).
2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover an assessment to determine the correctness of the application of the methodology, through an assessment of:
 - (a) the establishment of the baseline;
 - (b) the monitoring of leakage from possible off-site drying of alternative fuels; and
 - (c) the determination of the clinker production capacity at the time of validation.
