

**Annex 33****Registration****Scope of the review on
“Inner Mongolia Bayannaer Chuanjingsumu Wind Power Project” (2099)**

1. The Board agreed to undertake a review of the project activity “Inner Mongolia Bayannaer Chuanjingsumu Wind Power Project” (2099).
2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover a review of the additionality of the project activity, through an assessment of the investment analysis, in particular:
 - (a) the assumptions related to the tariff applicable to the project activity, as these are not consistent with the feasibility study report and therefore the Board wishes to assess the suitability of the tariff assumption contained in the PDD submitted for registration;
 - (b) the sensitivity analysis, as with a 2.2% decrease in the total investment costs the IRR is reached and the DOE has not provided any new justification that this variation is not likely to occur, as it happened with the turbine cost (actually verified to have decreased by 0.66%).
