

**Annex 37****Registration****Scope of the review on
“Sichuan Baishuijiang Shuanghe Hydro Power Project” (2155)**

1. The Board agreed to undertake a review of the project activity “Sichuan Baishuijiang Shuanghe Hydro Power Project” (2155).
2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover a review to assess the additionality of the proposed project activity, through an assessment of:
 - (a) costs of transmission networks as it is not clear how the DOE has validated the applicability and reliability of the costs of transmission networks and on which basis these costs have been divided amongst the seven served hydropower plants; and
 - (b) suitability of the input values and assessment of the assumed electricity supply to the grid in the investment analysis, as it has not been demonstrated that the coefficient of effective electricity is an accurate assumption in the context of this project activity.
