

**Annex 51****Registration****Scope of the review on
“Bromine Compounds Fuel-Switch Project ” (2237)**

1. The Board agreed to undertake a review of the project activity “Bromine Compounds Fuel-Switch Project ” (2237).
2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover a review to determine the additionality of the project activity through an assessment of the barrier analysis, as it has not been sufficiently demonstrated how the stated barriers would have prevented the baseline alternatives related to fuel switch to natural gas from happening and that the price differential between the heavy fuel oil (HFO) and the natural gas (NG) was not the main driver to implement the project activity.
