

**Annex 61****Issuance****Scope of the review on
“Optimization of steam consumption by applying retrofit measures in blow heat recovery system” (0677)**

1. The Board agreed to undertake a review of the project activity “Optimization of steam consumption by applying retrofit measures in blow heat recovery system ” (0677).
2. The Board agreed that the scope of the review relating to issues associated with verification requirements shall cover an assessment to determine how the DOE verified that the calculation of emission reductions, steam savings, and the specific steam consumption ratio is conducted in line with the methodology which requires the removal of data for those batch/shifts when production is beyond $\pm 5\%$ of the nameplate capacity.
