

**Annex 42****Registration****Scope of the review on****“Zhumadian Zhongyuan Gas-Steam Combined Cycle Power Project in Henan China” (2344)**

1. The Board agreed to undertake a review of the project activity “Zhumadian Zhongyuan Gas-Steam Combined Cycle Power Project in Henan China” (2344).
2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover a review to assess the:
  - (a) Additionality of the project activity through an assessment of the validation of the input values to the investment analysis, in particular, the tariff assumed as except referring to one registered project, no further substantiation of tariff is provided;
  - (b) Baseline determination, through an assessment of the levelized cost comparisons as the DOE has validated the input values used for the cost of the alternatives based on their respective feasibility study report/case study report. The DOE should provide a validation of the input values to the alternatives based on the guidance issued at EB 38, paragraph 54(c); and
  - (c) Application of the methodology, through an assessment of the demonstration and assessment of the surplus availability of natural gas in the region through the assessment of “existing and projected supply and demand balance in the region”.
