1. The Board agreed to undertake a review of the project activity “Yunnan Yingjiang Wakuhe Hydropower Station” (2052).
2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover a review to assess the additionality of the project activity through an assessment of the appropriateness of the transmission line cost assumed in the investment analysis, as the corrections requested by the Board at its forty-sixth meeting have not been properly undertaken and insufficient justifications have been provided on the means used by the DOE to validate the transmission line construction and the actual cost of its construction.
