

**Annex 48****Registration****Scope of the review on
“SeAH Besteel fuel switching project” (2735)**

1. The Board agreed to undertake a review of a project activity “SeAH Besteel fuel switching project” (2735).
2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover a review to determine the additionality and baseline of the project activity through an assessment of the:
 - (a) Prior consideration of the CDM as it appears that there is no evidence of continuing actions taken to secure CDM status in parallel with project implementation after the project start; and
 - (b) Compliance with the application of AMS-III.B. (version 13) as, it appears that the emission reduction calculations did not define the project output in terms of the energy as required by the methodology.
