

**DRAFT****Annex 6****DRAFT WORKPROGRAMME OF THE METH-PANEL
(First semester of 2010)**

Key priority category	Specific issue and link with other issues	Activities	Expected output	Current status	Expected end date
Methodological Tools					
	Finalisation of revised combined tool Requested for the deconsolidation of ACM0006.	<ol style="list-style-type: none"> 1. The secretariat finalises a first draft. 2. The MP considers this draft at Meth Panel 42 and Meth Panel 43. 3. The secretariat launches a call for public comments on the new combined tool. 4. The secretariat organizes a workshop with DOE and Methodologies developers. 5. The Meth Panel finalises the consideration of the issue accounting for the inputs from stakeholders. 	New combined tool which will introduce more objective approaches to determine baseline scenario and demonstrate additionality.	The secretariat has finalised the draft version including the comments from various members. This has been discussed at Meth Panel's 42 nd meeting. The panel decided to appoint two members to make an in depth review and report back to Meth Panel.	MP45
	Checking consistency of "Tool to assess the validity of the	1. The secretariat prepares a note in which it identifies	Either change in methodologies or	Meth Panel has identified 11	MP45

		recovery projects in iron & steel industries, by Meth Panel.		consultant) and simplify the methodology.	
	ACM0006: Deconsolidation in power only/ cogeneration/ heat only methodologies and include various requests for clarifications/ EB requests in the revised versions.	<ol style="list-style-type: none"> 1. The panel to work on the methodology specific solution for baseline scenario identification and additionality demonstration for the power-only methodology, which was recommended for approval of the Board in MP39. 2 The Secretariat and the Panel to work on biomass-based cogeneration methodology. 	Two new methodologies; one for power-only and other for cogeneration projects. Existing methodology AM0036 will have applicability of heat-only projects.	Biomass-based Power (only) generation methodology can be recommended for approval in conjunction with methodology specific solution to identify baseline scenario and demonstrate additionality, as the current “combined tool” can not be applied to the methodology. The work on biomass based cogeneration methodology is planned and will be taken up in next Meth Panel meeting/s.	MP45
Cross cutting issues	EB mandate on simplification and improving objectivity, applicability, usability and consistency of methodologies	<ol style="list-style-type: none"> 1. Work on the development of default operating parameters. 2. Identify nine approved 	Three improved methodologies having high impact on CDM projects	The activity starts after Meth Panel 42.	Continuous (Target for the whole year)
