

**Annex 30****Registration****Scope of the review on
“Jianli Kaidi Biomass Power Project” (3044)**

1. The Board agreed to undertake a review of a project activity “Jianli Kaidi Biomass Power Project” (3044).
2. The Board agreed that the scope of the review relating to issues associated with validation requirements shall cover a review to determine the compliance with the CDM requirements by the project activity through an assessment of the:
 - (a) Additionality of the project activity as it has not been demonstrated that the input values to the investment analysis (in particular the auxiliary electricity consumption, electricity tariff, income tax and heat price) and levelised cost analysis, to substantiate the heat price, are appropriate;
 - (b) Baseline of the project activity, as it has not been demonstrated that the biomass baseline is appropriate given that DOE has not mentioned how they have validated that the cost of biomass is not because of its value but due to cost of collection and transportation; and
 - (c) Emission reduction calculations given that the project emissions due to consumption of fossil fuels at the consumer sites have not been considered and is not clear if the existing boilers at the consumer site will continue to operate even after the implementation of the project or would it be sold/scrapped.
