

**Annex 34****Issuance****Scope of the review on****“Demand side energy conservation and reduction measures at ITC Tribeni Unit” (0745)**

1. The Board agreed to undertake a review of the project activity “Demand side energy conservation and reduction measures at ITC Tribeni Unit” (0745).
2. The Board agreed that the scope of the review relating to issues associated with verification requirements shall cover an assessment to determine:
 - (a) Whether the DOE has identified the increase in emission reductions as compared to the PDD for each project measure such as “F8B”, and verified:
 - (i) Whether there were changes in the components of project measures as compared to the components originally specified in the registered PDD for each of the project measures; and
 - (ii) If so, the impact on the baseline determination of the project measures due to these changes;
 - (b) How the DOE verified that the calculation of emission reductions for electricity saving measures is in accordance with the registered PDD which requires that the emission reductions shall be calculated using the difference between per unit hour power consumption times the total operating hours in the project.
