

**CLEAN DEVELOPMENT MECHANISM
PROPOSED NEW METHODOLOGY FOR A/R: MONITORING (CDM-AR-NMM)**

CONTENTS

- A. Identification of methodology
- B. Proposed new monitoring methodology.

SECTION A. Identification of methodology

A.1. Title of the proposed methodology:

>>

A.2. List of type(s) of A/R CDM project activity to which the methodology may apply:

>>

A.3. Conditions under which the methodology is applicable to A/R CDM project activities:

>>

A.4 Carbon pools covered by the methodology:

>>

A.5. What are the potential strengths and weaknesses of this proposed new methodology?

>>

SECTION B. Proposed new monitoring methodology

B.1. Overall summary description of the methodology:

>>

B.2. Monitoring of the baseline net GHG removals by sinks and the actual net GHG removals by sinks:

>>

B.2.1 Actual net GHG removals by sinks data:

>>

B.2.1.1. Data to be collected or used in order to monitor the verifiable changes in carbon stock in the carbon pools within the project boundary from the proposed A/R CDM project activity, and how this data will be archived:								
ID number <i>(Please use numbers to ease cross-referencing to table B.7)</i>	Data variable	Source of data	Data unit	Measured (m), calculated (c) or estimated (e)	Recording frequency	Proportion of data to be monitored	How will the data be archived? (electronic/paper)	Comment

B.2.1.2. Data to be collected or used in order to monitor the GHG emissions by the sources, measured in units of CO ₂ equivalent, that are increased as a result of the implementation of the proposed A/R CDM project activity within the project boundary, and how this data will be archived:								
ID number <i>(Please use numbers to ease cross-referencing to table B.7)</i>	Data variable	Source of data	Data unit	Measured (m), calculated (c) or estimated (e)	Recording frequency	Proportion of data to be monitored	How will the data be archived? (electronic/paper)	Comment

B.2.2. Description of formulae and/or models used to monitor the estimation of the actual net GHG removals by sinks:

>>

B.2.2.1. Description of formulae and/or models used to monitor the estimation of the verifiable changes in carbon stock in the carbon pools within the project boundary (for each carbon pool in units of CO₂ equivalent):

>>

B.2.2.2. Description of formulae and/or models used to monitor the estimation of the GHG emissions by the sources, measured in units of CO₂ equivalent, that are increased as a result of the implementation of the proposed A/R CDM project activity within the project boundary (for each source and gas, in units of CO₂ equivalent):

>>

This template shall not be altered. It shall be completed without modifying/adding headings or logo, format or font.

B.2.3. As appropriate, relevant data necessary for determining the baseline net GHG removals by sinks and how such data will be collected and archived:

ID number <i>(Please use numbers to ease cross-referencing to table B.7)</i>	Data variable	Source of data	Data unit	Measured (m), calculated (c) or estimated (e)	Recording frequency	Proportion of data to be monitored	How will the data be archived? (electronic/paper)	Comment

B.2.4. Description of formulae and/or models used to monitor the estimation of the baseline net GHG removals by sinks (for each carbon pool, in units of CO₂ equivalent):

>>

B.3. Treatment of leakage in the monitoring plan:

>>

B.3.1. If applicable, please describe the data and information that will be collected in order to monitor leakage of the proposed A/R CDM project activity:

ID number <i>(Please use numbers to ease cross-referencing to table B.7)</i>	Data variable	Source of data	Data unit	Measured (m), calculated (c) or estimated (e)	Recording frequency	Proportion of data to be monitored	How will the data be archived? (electronic/paper)	Comment

B.3.2. Description of formulae and/or models used to estimate leakage (for each GHG, source, carbon pool, in units of CO₂ equivalent):

>>

B.4. Description of formulae and/or models used to estimate net anthropogenic GHG removals by sinks for the proposed A/R CDM project activity (for each GHG, carbon pool, in units of CO₂ equivalent):

>>

B.5. Default values used in elaborating the new methodology:

>>

B.6. Please indicate how quality control (QC) and quality assurance (QA) procedures are **applied to the monitoring process**:

>>

B.7. Has the methodology been applied successfully for other purposes and, if so, in which circumstances?

>>
