

Field of Experience	Related Methodology or Tool	Summary
Adipic Acid Production	AM0021	<p>An expert input is required to provide technical information on the adipic acid market in order to enable the Meth Panel to understand the relevance of the possible effects of the crediting of N₂O abatement in a new plant as a CDM project activity. Some of the identified issues are:</p> <ul style="list-style-type: none"> • Possible configuration of plants in a way to intentionally increase the N₂O byproduct emission rate; • Partial production replacement of existing adipic acid plants; • Benefits to install a new plant in an Annex I or a non-Annex I country; • High profitability of new adipic acid plants due to CDM income leading to an increase in the offer of adipic acid without market demand.
