To whom it may concern,

In agreement of the Memorandum of understanding to develop pilot projects in accordance with the United Nations Framework on Climate Change, the Netherlands provided financial support under the Joint Implementation modality for the San Ramon Rural Electrification project. The MoU was signed in November 1998.

The financial resources were part of the public funding under the Dutch Pilot Project Programme Joint Implementation (PPP/JI) and were as such additional to the regular programming of the Development Cooperation Programme for Bolivia. Consequently, it does not result in a diversion of Official Development Assistance (ODA).
