<ol style="list-style-type: none"> 1. In the spreadsheet the emission reduction was calculated based on the electricity export rather than the net electricity export (export minus import). The DOE identified this issue as the Corrective Action Request (CAR) 1 but closed the issue without correction in the monitoring report and the spreadsheet. 2. The quantity and the calorific value of bagasse were not reported, however this is required by the monitoring plan. 3. The DOE shall further clarify how they have verified that the above mentioned calculations and parameters are reported according to requirements. 4. The DOE shall further clarify how they have prepared its own materials balance and how they have performed cross-checking of the results in order to verify emissions reductions.
