Other Issue: The PDD states that in Phase 1A, 1B and 2 the installed capacities will be 485 kW, 785 kW, and 11.5 MW, respectively. The DOE verified that the actual nameplate capacities for the respective phases are 500kW, 900 kW, and 11.5 MW while the monitoring report states that the installed capacities are 500kW, 1MW, and 12MW. Clarification is required as to the reason for these changes from the PDD and the inconsistencies in the description of the capacity.
