<p>1. The monitoring plan states that the flare efficiency will not be monitored and the design combustion efficiency will be provided by a third party. Since according to the methodology this parameter will guarantee the correct performance of the digester and gas recovery, further clarification is required on how the DOE has verified this value.</p> <p>2. The DOE deferred the FAR5 from the previous verification regarding the failure of biogas monitoring equipment as a FAR2 to be resolved in next verification. However, there is no explanation why this FAR5 was not resolved during this monitoring period.</p>
