<p>1. The total nitrogen content and the temperature of the manure are not contained in the monitoring report. Further clarification is required.</p> <p>2. The monitoring report states that the five-day Biological Oxygen Demand (BOD) was calculated. This deviates from the registered monitoring plan and the approved methodology which require the measurement of this parameter. The verification report has not appropriately addressed this deviation.</p> <p>3. The verification report indicates that the FAR 2 from the previous verification report related to changes made to the final treatment stage still appears as FAR 1 in this verification report. Further clarification is required on why the DOE has not resolved this FAR.</p>
