SUBJECT: Request for review 0187 Jalles Machado Bagasse Cogeneration

Dear Sirs,
Please find attached the response to the request for review formulated for the CDM project with the registration number 0187.

In case you have any further inquiries please let us know as we kindly assist you.

Yours sincerely,

A handwritten signature in dark ink, appearing to read 'Sergio Carvalho', with a large, sweeping flourish at the end.

Sergio Carvalho
Local Product Manager

Request for review for: " **0187 Jalles Machado Bagasse Cogeneration**"

Request . *"The implementation of the project shall not increase the bagasse production in the facility and the bagasse at the project facility should not be stored for more than one year." Clarification is required on how this requirement has been met"*

Response by the DOE:

The DOE could verify the data provided in the PP's response to this request and the conclusion is that they are correct. The DOE also agrees with the explanation presented by the PP for the increasing of the bagasse production. The official data about the production of sugar cane in the region where the project activity is located show that was an increase in the sugar cane production compared with the previous years. Data available in the website www.unica.com.br/userFiles/estatisticas/produção%20centro-sul%203.xls

The DOE issued a version 2 of the verification report with the comment above in section 3.3
