USINA BARRA GRANDE DE LENÇÓIS S/A
Rodovia Marechal Rondon, km 289 – Caixa Postal 358
Lençóis Paulista - SP

Attention to: Mr. Paulo Ferrari

Reference: Usina Barra Grande Boilers

Dear Sirs,

We are pleased to confirm you that the steam boilers existing in Usina Barra Grande - (with an output of 180TON/H, 66kgf/cm² working pressure, 520°C steam temperature manufactured by Caldema as well as the two other boilers that were also retrofitted and modernized by Caldema) - are boilers that were exclusively designed and built for burning 100% sugarcane bagasse and cannot burn other type of fuel, mainly if such a fuel is fossil by-products.

Sincerely,

José Roberto Martinelli
Director

AÇUCAREIRA ZILLO LORENZETTI S/A
Usina São José
Rodovia Lençóis Paulista – Macatuba, km 06 – Caixa Postal 25
Macatuba - SP

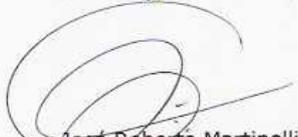

Attention to: Mr. Paulo Ferrari

Reference: Usina São José Boilers

Dear Sirs,

We are pleased to confirm you that the steam boiler with an output of 150TON/H, 42kgf/cm² working pressure, 400°C steam temperature currently existing in the mill, whose modernization and maintenance is always carried out by our company and, also the boiler with an output of 300TON/h, 94kgf/cm², 520°C manufactured by Caldema and now in its stage of erection on site, are boilers that were exclusively designed and built for burning 100% sugarcane bagasse and cannot burn other type of fuel, mainly if such a fuel is fossil by-products.

Sincerely,

José Roberto Martinelli
Director
