## CERTIFICATION STATEMENT

This certification report is based on the 2<sup>nd</sup> periodic verification as documented in the verification report No. 4873-07/30-V01, revision 1.

Açucareira Zillo Lorenzetti S.A and Usina Barra Grande de Lençóis S.A (Zillo Lorenzetti Group) have commissioned the TÜV NORD JI/CDM Certification Program to carry out the 2<sup>nd</sup> periodic verification of the project: "*Zillo Lorenzetti Bagasse Cogeneration Project*", with regard to the relevant requirements for CDM project activities. The project reduces GHG emissions by displacement of conventional generated electricity in the Brazilian interconnected grid by renewable power from a bagasse-based cogeneration plant.

This verification covers the period from 2006-01-01 to 2006-12-10.

A risk based approach has been followed to perform this verification. In the course of the verification one remaining Forward Action Requests (FAR), one Corrective Action Request (CAR) and no Clarification Request (CR) were raised.

The verification is based on the draft monitoring report (December 2006), the final monitoring report (July 2007), the monitoring plan as set out in the validated PDD, the validation report, the verification report from previous verification and supporting documents made available to the TÜV NORD JI/CDM CP by the project participants.

As the result of the 2<sup>nd</sup> periodic verification, the verifier confirms that the GHG emission reductions are calculated without material misstatements in a conservative and appropriate manner. TÜV NORD JI/CDM CP herewith certifies that the project has achieved emission reductions in the above mentioned reporting period as follows:

Baseline emissions:	62,603	t CO <sub>2eq</sub>
Project emissions:	0	t CO <sub>2eq</sub>
<b>Emission reductions:</b>	<b>62,603</b>	<b>t CO<sub>2eq</sub></b>

Essen, 2007-07-10

A handwritten signature in black ink, appearing to read "R. Winter".
