The project activity is claiming zero project emissions in the monitoring report since it is indicated in the PDD that no fossil fuel will be consumed. However, it is unclear from the verification report how the DOE has verified no fossil fuel has been consumed and thus confirming zero project emissions. Although the monitoring plan does not specify the requirement for monitoring of the fossil fuel used within the project boundary, the monitoring methodology applied to this project activity stipulates this requirement. The DOE should have verified that no emissions from the consumption of the fossil fuel have been generated by the project activity in accordance with the approved methodology.
