

 <b>CDM project activity issuance review form</b> <i>(By submitting this form, a Party involved (through the designated national authority) or an Executive Board member may request that a review is undertaken)</i>	
<b>Designated national authority/Executive Board member submitting this form (Name in print)</b>	
<b>Title of the proposed CDM project activity for which issuance is requested</b>	0209 Central Energética do Rio Pardo Cogeneration Project (CERPA)
<b>DOE that requested for issuance and date of request</b>	RWTUV 12.06.2007
<b>Please indicate, in accordance with paragraphs 65 of the CDM modalities and procedures, for which reason(s) you request review. (Place a cross (X) in front of the reason)</b>	
<input type="checkbox"/> <i>Fraud</i> <input type="checkbox"/> <i>Malfeasance</i> <input checked="" type="checkbox"/> <i>Incompetence</i>	
<b>Please indicate reasons for the request for review and attach any supporting documentation to this request form. (if space is not sufficient please attach further reasons)</b>	
<p>1). The project activity is claiming zero project emissions in the monitoring report since it is indicated in the PDD that no fossil fuel will be consumed. However, it is unclear from the verification report how the DOE has verified no fossil fuel has been consumed and thus confirming zero project emissions. Although the monitoring plan does not specify the requirement for monitoring of the fossil fuel used within the project boundary, the monitoring methodology applied to this project activity stipulates this requirement. The DOE should have verified that no emissions from the consumption of the fossil fuel have been generated by the project activity in accordance with the approved methodology.</p> <p>2). The power produced during this seven-month monitoring period is 72,391.98 MWh, while the PDD indicates 45,000-60,000 MWh/y has been generated as surplus since 2003. While the electricity generated has been monitored correctly, there is no further explanation in the monitoring report on the reasons of the significantly higher emission reductions achieved during this monitoring period.</p>
