<p>The verification report mentions that during this monitoring period there were 21 short stops of the HFC23 incineration, for which the analysis of HFC23 in tail gas at the time of each stop and restart was done as per the monitoring plan. Clarification is required whether the HCFC22 was still being produced when the HFC23 incinerator stopped operating, and how the quantity HCFC22 produced during these periods have been taken into account in the subsequent calculation of emission reductions.</p>
