<ol style="list-style-type: none"> <li>1. The steam consumption of the chiller was calculated as the difference between closing and opening readings of the meter. However in June-July 2006 the monthly opening reading does not correspond to the closing reading of the previous month. Clarification is required on how DOE has verified the accuracy of this parameter.</li> <li>2. The PDD stated that "15 t/h of steam will be generated for palm oil refinery process consumption and 3 t/h will be used to provide cooling through a new absorption chiller system." However, the relative steam supply to the chiller during this monitoring period is below the relative steam supply to the refinery. Further clarification is needed.</li> </ol>
