Certification Report

Quimobásicos HFC Recovery and Decomposition Project

Periodic Verification

of the registered CDM project

No. 0151

Report No. 1175058

June 24th, 2008

**TÜV SÜD Industrie Service GmbH
Carbon Management Service
Westendstr. 199 - 80686 Munich - GERMANY**

1 VERIFICATION STATEMENT

TÜV SÜD Industrie Service GmbH has performed a periodic verification of the registered CDM project No 0151: "Quimobásicos HFC Recovery and Decomposition Project" in Mexico. The verification is based on requirements of the UN Framework Convention on Climate Change (UNFCCC). In this context, the relevant documents are the "Marrakech Accords".

The management of Quimobásicos S.A. de C.V. is responsible for the preparation of the GHG emissions data and the reported GHG emissions reductions.

The verifier confirms that all the elements of the project necessary for the HFC decomposition are implemented as planned and described in registered PDD, revised monitoring plan approved on September 05, 2007 and applied methodology. The installed equipment runs reliably and is calibrated appropriately. The monitoring system is in place and the project does generate GHG emission reductions as a CDM project.

Installed equipment being essential for generating emission reduction and for metering the data defined in the monitoring plan runs reliably and is calibrated appropriately. The monitoring system is in place and the project generates GHG emission reductions according to the approved methodology.

The verifier can confirm that the GHG emission reduction is calculated without material misstatements for the whole monitoring period. Issues indicated as Forward Action Request will be verified by the audit team during the next periodic verifications.

Our opinion relates to the project's GHG emissions reductions reported and related to the valid project baseline and monitoring, and its associated documents.

Based on the information we have seen and evaluated, we confirm the following statement:

Reporting period: from December 31, 2007 to March 30, 2008.

Verified emission in the above reporting period:

Baseline Emissions:	620007 t CO ₂ e
Project Emissions:	47 t CO ₂ e
Leakage:	82 t CO ₂ e
Emission Reductions:	619878 t CO ₂ e

Munich, 24.06.2008
