|  <b>CDM project activity issuance review form</b><br><i>(By submitting this form, a Party involved (through the designated national authority) or an Executive Board member may request that a review is undertaken)</i>   |   |
| <b>Designated national authority/Executive Board member submitting this form (Name in print)</b>  |   |
| <b>Title of the proposed CDM project activity for which issuance is requested</b>   | 0546<br>SRGEL Non-Conventional Energy Sources Biomass Power Project |
| <b>DOE that requested for issuance and date of request</b>  | 11/02/08 DNV  |
| <b>Please indicate, in accordance with paragraphs 65 of the CDM modalities and procedures, for which reason(s) you request review. (Place a cross (X) in front of the reason)</b>   |   |
| <input type="checkbox"/> <i>Fraud</i> <input type="checkbox"/> <i>Malfeasance</i> <input checked="" type="checkbox"/> <i>Incompetence</i>   |   |
| <b>Please indicate reasons for the request for review and attach any supporting documentation to this request form. (if space is not sufficient please attach further reasons)</b>  |   |
| <p>1. The reported electricity generations in the months of February and June 2007 are beyond the maximum generation capacity based on the operating hours reported in the respective months. Further clarification is required.</p> <p>2. The PDD states that the emission reduction shall be calculated based on the annual total clean power export to grid. However, in the monitoring report the total clean power export to grid includes both the power export to the grid and power export to third party. The monitoring plan includes the monitoring of “power export” measured at the substation, however, does not include the monitoring of power export to third party. Further clarification is required.</p> <p>3. Regarding the availability of biomass in the region, the monitoring report stated that the total biomass available in the region was 2,762,251 t and the total biomass utilization in the region is 1,438,346 t and therefore the total surplus biomass in the region after usage is 1,323,905 MT. However, the DOE verified that “it has been confirmed that the surplus biomass available in the region is around 94%.” Further clarification is required.</p> |   |
