<p>1. The monitoring report stated that the generated electricity was supplied not only to the grid but also to a construction site of hydro power station, while the PDD stated the generated electricity is fed to the China Southern Power Grid. It also stated that "If the project did not supply power to Laqi construction site, Laqi electricity generation Co. Ltd would have to purchase its power from the grid. Therefore, the power directly supplied to Laqi is deemed as on-grid power." Further clarification is required on how the DOE verified the net electricity supply to the grid by the project activity and the calculation of the emission reduction.</p>
