<p>1. The flare efficiency of 99.2% was determined from an analysis conducted by a third-party laboratory in June 2007. However, the methodology and the monitoring plan require that the flare efficiency is determined at the time of installation. Clarification is required how this requirement has been met.</p> <p>2. The DOE closed a Corrective Action Request regarding the operation of the flare device which works at lower temperature in relation with how the CH₄ fraction in the exhaust gases will be reduced. Further clarification is required how the DOE has closed this CAR.</p>
