

REVIEW OF THE PROJECT ACTIVITY

Energy efficiency and fuel switching measures in the caustic soda and sodium cyanide plant at Vadodara complex of GACL (0951)

The Board agreed to reject the project activity “Energy efficiency and fuel switching measures in the caustic soda and sodium cyanide plant at Vadodara complex of GACL” (0951), submitted for registration by the DOE (DNV Certification AS), because the project activity does not meet the requirements of paragraph 37(e) of the CDM modalities and procedures because the AMS-III.B methodology applies to switching fossil fuels and not to the submitted project activity, which involves the use of hydrogen.
