SUB : Resumption of Supply of Hydrogen Gas

REF : M/s. GACL letter No. GACL/MKTG/03-04/2654 dated 18.09.2003.

Dear Sir,

We refer to various discussions we have had with M/s. GACL on the above subject and the recent meeting of our Director Mr. Mehool Bhuya with Shri P.K. Taneja, IAS, Managing Director, who has been extremely kind and cooperative to help us in restart of our plant by giving alternatives for resumption of Hydrogen Gas and also settling the pending issues of outstanding payments as per our proposed schedule.

As mentioned in the above letter (copy attached herewith), M/s. GACL has given us two alternatives :-

01. Indu Nissan to supply 9600 M3/day of Natural Gas to M/s. GACL from their quota of M/s. GAIL :-

M/s. GAIL is having shortage of Natural Gas and hence Indu Nissan can not supply 9600 M3/day Natural Gas. Indu Nissan can supply only 2000 to 3000 M3/day Natural Gas only.

02. Supply of Hydrogen Gas in Cylinder from M/s. GACL, Dahej :-

Transporting 8000 M3/day of Hydrogen Gas from Dahej to Bajuwa @ 130 Kms is difficult,

Handling such a quantity may be unsafe, and

It may take more time for new installation approval from various authorities etc.
