<p>1. The natural gas consumption for M6 equipment group was calculated rather than measured. This deviates from the registered monitoring plan which stipulates the natural gas consumption shall be monitored continuously by the meters. The verification report has not appropriately addressed this deviation.</p> <p>2. The natural gas consumption for parts of C1-C6, M1-M6 was calculated rather than measured. This is not in accordance to general guidance for small-scale CDM project activities in Annex 33, EB 23, which stipulates “data variables that are most directly related to the emission reductions should be measured continuously”. The verification report has not appropriately addressed this deviation.</p>
