<p>The AdOH production was calculated based on the measured AHS production and a factor of 0.557 as ratio of AdOH/AHS. Although this was verified by the DOE in NIR 03 (New Information Request) as conservative, this is not in accordance with the registered monitoring plan which requires AdOH production to be sourced from “the production record of AdOH” and “measured by the measuring equipment”. Further clarification is required on how the DOE verified AdOH production in line with the registered monitoring plan.</p>
