

REVIEW OF THE PROJECT ACTIVITY

M/S. Kothari Sugars and Chemicals Ltd (KSCL)'s Bagasse Based Co-generation Project, at Perambalur district, Tamil Nadu, India (1109)

At its thirty-fifth meeting the Board agreed to register the project activity if the DOE and project participant submit a revised PDD and corresponding revised validation report which provide further substantiation of the common practice analysis considering that 7 of the 36 sugar factories in the region have installed biomass fired cogeneration facilities with a capacity of more than 15MW without being registered as CDM project activities.

At its thirty-sixth meeting the Board could not register the project activity submitted for registration by the DOE (DNV Certification AS), because the corrections submitted by the DOE and project participant have failed to demonstrate that the project activity is not common practice, in accordance with the requirements of the "Tool for the demonstration and assessment of additionality".
