

**CDM project activity registration review form (F-CDM-RR)**  
**(By submitting this form, a Party involved (through the designated national authority) or an Executive Board member may request that a review is undertaken)**

<b>Designated national authority/Executive Board member submitting this form</b>	
<b>Title of the proposed CDM project activity submitted for registration</b>	Tungabhadra wind power project in Karnataka; Project activity 1268

**Please indicate, in accordance with paragraphs 37 and 40 of the CDM modalities and procedures, which validation requirement(s) may require review. A list of requirements is provided below. Please provide reasons in support of the request for review, including any supporting documentation.**

- ☐ *The following are requirements derived from paragraph 37 of the CDM modalities and procedures:*
- ☐ The participation requirements as set out in paragraphs 28 to 30 of the CDM modalities and procedures are satisfied;
  - ☐ Comments by local stakeholders have been invited, a summary of the comments received has been provided, and a report to the designated operational entity (DOE) on how due account was taken of any comments has been received;
  - ☐ Project participants have submitted to the DOE documentation on the analysis of the environmental impacts of the project activity, including transboundary impacts and, if those impacts are considered significant by the project participants or the host Party, have undertaken an environmental impact assessment in accordance with procedures as required by the host Party;
  - ☒ The project activity is expected to result in a reduction in anthropogenic emissions by sources of greenhouse gases that are additional to any that would occur in the absence of the proposed project activity, in accordance with paragraphs 43 to 52 of the CDM modalities and procedures;
  - ☒ The baseline and monitoring methodologies comply with requirements pertaining to methodologies previously approved by the Executive Board;
  - ☐ Provisions for monitoring, verification and reporting are in accordance with decision 17/CP.7, the CDM modalities and procedures and relevant decisions of the COP/MOP;
  - ☐ The project activity conforms to all other requirements for CDM project activities in decision 17/CP.7, the CDM modalities and procedures and relevant decisions by the COP/MOP and the Executive Board.
- ☐ *The following are requirements derived from paragraph 40 of the CDM modalities and procedures:*
- ☐ The DOE shall, prior to the submission of the validation report to the Executive Board, have received from the project participants written approval of voluntary participation from the designated national authority of each Party involved, including confirmation by the host Party that the project activity assists it in achieving sustainable development;
  - ☐ In accordance with provisions on confidentiality contained in paragraph 27 (h) of the CDM modalities and procedures, the DOE shall make publicly available the project design document;
  - ☐ The DOE shall receive, within 30 days, comments on the validation requirements from Parties, stakeholders and UNFCCC accredited non-governmental organizations and make them publicly available;
  - ☐ After the deadline for receipt of comments, the DOE shall make a determination as to whether, on the basis of the information provided and taking into account the comments received, the project activity should be validated;
  - ☐ The DOE shall inform project participants of its determination on the validation of the project activity. Notification to the project participants will include confirmation of validation and the date of submission of the validation report to the Executive Board;
  - ☐ The DOE shall submit to the Executive Board, if it determines the proposed project activity to be valid, a request for registration in the form of a validation report including the project design document, the written approval of the host Party and an explanation of how it has taken due account of comments received.
- ☐ There are only minor issues which should be addressed by the DOE / project participants prior to the registration of the project.

**Section below to be filled in by UNFCCC secretariat**

Date received at UNFCCC secretariat	05/10/2007
-------------------------------------	------------

Reason for request:

1. The PP shall further demonstrate the additionality of the project activity.
2. Version 2 of the additionality tool is no longer applicable.
3. For a project activity of this type, a project IRR should be calculated rather than an equity IRR.
4. Further information should be supplied regarding how it has been validated that the applied benchmark has been assessed to be the most suitable indicator against which to compare the IRR of the project activity.

5. Further information should be supplied regarding how the plant load factor has been validated and how the variations in this assumption for the sensitivity analysis have been considered appropriate.
6. The project applies the approved consolidated methodology ACM0002, version 6 dated 19 May 2006. The baseline has been established by using the operating margin (OM) and build margin (BM) data published in government database. The DOE validate the database as an official publication of the Government of India for the purpose of CDM baselines and confirms that the discussion of the baseline selection has been done in a transparent manner. However, in Section B.4. of PDD, the baseline scenario is directly identified according to ACM0002 as the emissions generated by the operation of grid-connected power plants and by the addition of new generation sources. But in Sub-step 1a of Section B.5., it concludes that the continuation of the current situation (no project activity or other alternatives undertaken) would not be applicable. In addition, further explanation is required on why it is impossible that a baseline scenario is constituted by the comparable utility scale hydro power project, which has been listed as one of alternatives.
7. The project directly adopted OM and BM from the government database. The DOE shall further clarify how they have verified whether the OM and BM calculation are strictly following ACM0002, and why there is no real calculation process in PDD.
