

Subject: CDM Project

C&MD vide his note dated 04.01.04 n/p 17 has given following decisions:

1. Consultant should be short listed by a committee of Head, COIN, Chief (TS) and Head, HSE on criteria of
 - Proven Experience
 - Presence in India
 - Credibility & Credentials
2. Validators are to be engaged only after DOE status is notified
3. We mostly use gas for own fuel, and therefore, GHG emissions should be well within Kyoto standards for India. The selected consultant should focus only at the exception where fuels other than gas is used.

Deliberations

The committee members deliberated the above and concluded as under:

1. Short Listing of Consultant
CDM being a new field, there are limited consultants available in this area as on date. It is therefore necessary to elicit information from all the six consultants mentioned on n/p 11 to 13 seeking information about their company profile, personnel experience, detailed experience in CDM area, their Indian address and other related information to establish their credibility, for selection as a consultant.
2. Head, HSE may obtain the information and the committee would thereafter deliberate on future course of action. The firms may be given about two week time to reply pending otherwise they will not be considered.
