After elaborative organizing, installation and debugging, this project has been put into formal operation. The whole project building unit has conducted considerate and strict organizing, adopted proper production protection measures, and completed all designed contents. On August 1, 2006, this project was finished debugging, and put into formal power generation. During the construction period, there was not any safety accident; the completion materials are complete, and the materials used are qualified. After inspection through trial run, this project is proved to meet the design and user's utilization requirements, as well as national related industrial standards. All persons attending the conference agree with the acceptance for immediate delivery, and the quality guarantee period is calculated from the date of acceptance.
